

Drivkraft for fremtidsrettede energiløsninger

Enova SF

Eli Arnstad

Director, Enova SF

IEA Bioenergy Task38 & Task 40 Workshop, Trondheim 5 -6 April 2006

About Enova

- State enterprise owned by the Ministry of Petroleum and Energy
- Established June 2001, operational 1 January 2002
- 32 employees
- Manages the Energy Fund, app. 80 mill € per year
- The Energy Fund is financed through a levy on the electricity transmission tariff

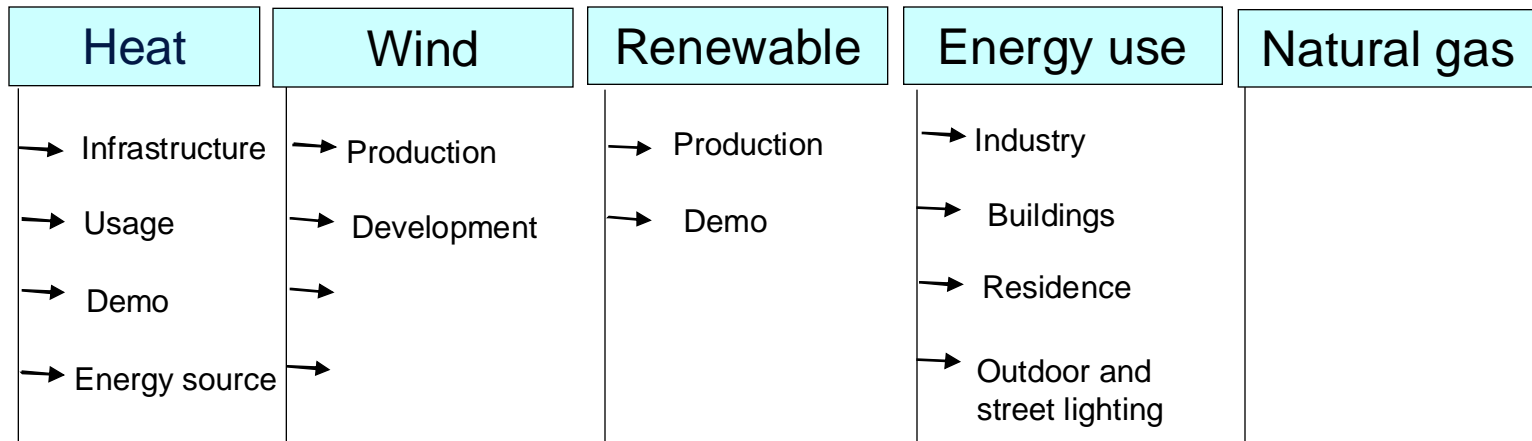

Objectives

- Bring about an environmental sound change in energy generation and use
- Achieve 12TWh/year in savings or new renewable energy by 2010
 - Limit energy use considerably more than if developments were allowed to continue unchecked
 - Decrease dependency on electricity for heating and increase use of water-based central heating systems with renewable energy sources, heat pumps and waste heat of 4 TWh
 - Increase wind power generation by 3 TWh/year
- Increase environmentally sound stationary use of natural gas

Enova's programme structure

"Energy source – Energy distribution – Energy users"

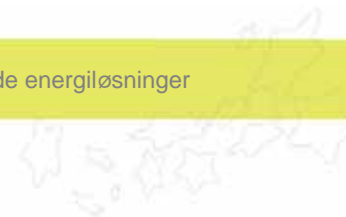

Communication – Training – Information

Strategy and analysis

Measures

- Information and awareness campaigns
- Education courses
- Support for energy planning
- Investment aid to energy saving and production of energy from renewable sources
- Calculations based on NPV-approach and fair return on invested capital, avoiding:
 - overcompensation
 - free riders

Bioenergy priorities and measures

- Priorities
 - Development of the heat market
 - Securing sufficient supply of biofuel in all regions
- Measures:
 - Information and education, statistics and courses
 - Support for energy- and environmental planning by municipalities
 - Investment support for solid biofuel production, heat generation and heat distribution
- Annual budget for heat and bioenergy, app. 25 mill. €

Drivkraft for fremtidsrettede energiløsninger

Thank you for your
attention!
